

SP. Siddharth

Smart Contract Security Auditor / Blockchain Security Researcher

New Delhi, India

ABOUT ME

Hi, I'm Siddharth, a smart contract auditor with a year of experience digging into DeFi protocols to find bugs that matter. Delivered confirmed critical/high-severity findings on HackenProof, covering AMMs, lending protocols, stablecoins, and cross-chain bridge infrastructure.

HIGHLIGHTS

- Real-world, hands-on experience auditing live DeFi protocols with confirmed critical/high-severity findings
- 6,000+ nSLOC of Solidity code reviewed and audited across DeFi and blockchain protocols
- Confirmed critical/high-severity findings on HackenProof bug bounty program
- Open to freelance, full-time, and private audit collaborations

AREAS OF EXPERTISE

- Smart Contract Auditing — Manual code review, vulnerability assessment, adversarial verification
- DeFi Security — AMMs, lending protocols, staking, CDPs, stablecoins
- Secure Solidity Patterns — Best practices, common pitfall detection, gas-aware secure design

TECHNICAL SKILLS

Languages: Solidity, JavaScript

Security Tools: Slither, Aderyn, Foundry (PoC development and testing)

Development Frameworks: Foundry, Hardhat

Automated Audit Tooling: Able to build custom AI-assisted auditing skills and tooling to speed up review workflows

Core Competencies:

- EVM internals and gas optimization
- Static analysis and automated tooling
- Manual/adversarial code review methodology
- Foundry-based proof-of-concept exploit development

AUDIT PORTFOLIO

Protocol	Category	Vulnerabilities Found	Severity	Report
Rain	DeFi	2	Critical / Low	
TradeBois	DeFi	1	High	
Ember EVM	EVM / Infrastructure	1	—	
0xMarkets	DeFi / Markets	1	High	
Layer3	Infrastructure	1	—	
NADO	DeFi	1	Low	
MawariSC	DeFi	1	Medium	

Full reports available on request or via my HackenProof profile: hackenproof.com/hackers/sez

ACHIEVEMENTS & CERTIFICATIONS

Built **JELLO**, a custom AI-assisted auditing skill/toolkit for faster smart contract review: github.com/Siddev09/Jello.Skill

AWS Certified AI Practitioner — Amazon Web Services Training and Certification: [View credential](#)

Certified Blockchain Developer™ — Blockchain Council: [View credential](#)

Advanced Smart Contract Security Certification — covering common and advanced attack vectors with hands-on practice modules: [View credential](#)

LET'S CONNECT

Open to collaborating on security reviews, protocol audits, or discussing blockchain security — freelance, full-time, or private engagements welcome.
